

Suma Nova

Liquid mechanical ware washing detergent for hard water

L6

Description

Suma Nova L6 is a concentrated liquid mechanical ware washing detergent specially formulated to provide excellent soil removal in hard water conditions.

Key properties

Suma Nova L6 is a heavy duty alkaline liquid detergent which is suitable for use in a wide range of single and multi-tank ware washing machines. It contains a blend of caustic alkali and scale control agents, which will provide excellent soil removal. The high level of powerful scale control agents will also prevent scaling in hard water conditions.

Suma Nova L6 is also supplied in SafePack packaging, providing a closed system with unique colour coded key connectors to prevent personal exposure and reduce confusion.

Benefits

- Cuts through grease and dried-on food
- Being highly concentrated gives greater economy in use
- Prevents scaling of the dish wash machine even in hard water conditions

Use instructions

Suma Nova L6 is normally applied using JohnsonDiversey automatic dispensing equipment. It can however be used in conjunction with integral dosing pumps where fitted. To ensure perfect cleaning results in hard water conditions, dose at a concentration of 1.5 - 4 ml/litre, depending on local site conditions.

At 2 ml/litre, this will prevent scale deposits in water containing up to 205 ppm CaCO_3 .

At first use, rinse pump and transport tubes of the dosing system to avoid possible crystallisation in these tubes caused by mixing of products.

Technical data

Appearance	clear yellow liquid
pH (1% solution)	12.2
Relative density	1.27

These figures are typical values and should not be interpreted as specifications.

Safe handling and storage information

Full guidance on the handling and disposal of this product is provided in a separate Material Safety Data Sheet.

Store in original container. Avoid extremes of temperature.

Product compatibility

Under recommended conditions of use, **Suma Nova L6** is suitable for use on most materials commonly encountered in the kitchen. Do not use on alkali sensitive items such as copper, brass, aluminium or rubber.
