

Sani Des J-Flex

Washroom cleaner & disinfectant

W9a

Description

Sani Des J-Flex is a cleaner and disinfectant for all washroom surfaces

Key properties

- Versatile cleaner and disinfectant
- Disinfectant, effective against a wide range of micro organisms
- Fresh fragrance

Benefits

- Removes common washroom soils
- Reduces the risk of cross-contamination
- Leaves a pleasant fragrance
- Convenient and controlled dosing through the J-Flex system

Use instructions

The J-Flex dosing system does give controlled dosing both for triggers as for bucket filling.

Spray Cleaning:

1. Rotate selector to BOTTLE and fill the spray bottle
2. Spray the solution directly onto surface (or onto a cloth for smaller areas) and wipe
3. Leave for at least 5 minutes
4. Clean surface with cloth or sponge
5. Rinse with clean water and allow to dry

Bucket Cleaning:

1. Rotate selector to BUCKET and fill bucket
2. Apply the solution with a cloth/sponge or mop
3. Leave for at least 5 minutes
4. Rinse with clean water and allow to dry

Packaging	Dosages		Amount of RTU solution (litres) per pack	Amount of 750 ml trigger bottles	Amount of 5 litre buckets
1.5 litre	Bucket	1:100	150		
	Trigger	1:50	75	100	30
5.0 litre	Bucket	1:100	500		100
	Trigger	1:50	250	333	

Technical data

Appearance:	clear, red liquid
Density at 20°:	1.050
pH-value neat:	10.0 - 11.0
pH-value for both solution rates:	9.5 - 10.5

The above data is typical of normal production and should not be taken as a specification.

Sani Des J-Flex

Safe handling and storage information

Safe handling:

Rinse and dry hands after use. The use of a skin reconditioning cream, such as **Soft Care Dermasoft H9**, may be beneficial. For prolonged contact, protection for the skin may be necessary.

Full guidance on the handling and disposal of this product is provided in a separate Material Safety Data Sheet.

Only for professional users / specialists.

Storage Information:

Store in original closed containers away from extremes of temperature.

Environmental information

The surfactants used in this product are biodegradable in compliance with the requirement of EC Directives 73/404/EEC and 73/405/EEC and their subsequent amendments.

Microbiological data

Sani Des J-Flex passed EN 1276 at a dilution of 1% in hard water (300ppm as CaCO₃) and in dirty conditions (0.3% bovine albumin), and contact time of 5 minutes.

Sani Des J-Flex will pass an European suspension test with high soil level (1.0% bovine albumin) at a 1% concentration and contact time of 5 minutes.
